

NEX SERIES® SIMPLEX PANEL

Single Phase Simplex Control Panel

The **NEX Series**® simplex panel is designed to control one single phase pump in water and wastewater applications. Two control switches activate a power relay to turn the pump on and off. If an alarm condition occurs, an additional alarm switch activates the audible/visual alarm system. The **compact design** (8" x 6" x 4") is ideal for residential applications. Universal pump voltage and control/alarm power allow the NEX Series® panel to handle **three voltages** (120/208/240V). The **innovative internal design** of components and integral **mounting tabs** make **installation quick and simple**. Includes integral padlockable latch for added safety.
